

Here we feature photographs from a collection of Retreat interiors. Working in partnership with our Designers you will create a perfect home for yourselves. Internal floor plan layouts are specifically designed for you, the client. Additionally, a unique Specification Day at Retreat allows you to select all the fixtures and fittings with your Designer.

We are nestled in north Cumbria on the edge of The English Lake District. Our Retreats feature architectural detailing, all structural timber work set at 400mm centres, rodent resistant pipe-work, and galvanised steel guttering amongst many other standard features. A ten year Gold Shield warranty underpins our workmanship and your Retreat, ensuring peace of mind.

Our Retreats are individually designed and manufactured for each client meaning that our Retreats are as unique as you are. Through working in partnership with our Designers we will create a perfect home for you. Our external cedar clad aesthetics can be tailored to your exact wishes as, too, can your internal floor plan requirements.

Highlighted here on the front and back cover are an array of options you can choose from for your own personal and unique Retreat external aesthetic and roof structure. Our standard build is vertical cedar carried through on all four corners and a standard traditional pitch roof. Other options come with their own price implications that you would need to consider.
